

big beautiful buildings

Als die Zukunft gebaut wurde.

international summer school

YESTERDAY'S FUTURE FOR TOMORROW

Schedule:

Part 1 (May 22–26, 2018):

the on-site work deals with the discovery and recording of the post-war modernism at different levels. In addition, a communication concept for part two of the Summer School will be jointly developed and defined. The aim is to reach a wide range of target groups with a variety of formats.

Part 2 (July 26–28, 2018):

presentation, discussion and reflection of the results with „interactive“ formats (e.g. workshops, excursions) which are performed by the participants and are open to the public.

Information, Registration, Credits:

Technical University Dortmund
Master Spatial Planning
„Methoden des städtebaulichen Entwerfens“
Modul 3, 4 Credits
Languages: English, German

Project:

Big Beautiful Buildings. When we built the future
In Cooperation with StadtBauKultur NRW

Content:

Currently, the post-war modernism of the 1950s to 1970s is being rediscovered. Especially in the social media, interest for these architectures is growing, as for example the Facebook group “The Brutalism Appreciation Society” shows. Till now, there is only a small group recognizing the innovative, experimental and forward-looking character of the buildings and structures of this phase. Therefore, our aim is to trace, analyse, take forward and mediate the special and the characteristic features – but also the everyday part – of these architectures and urban spaces. Like no other region, the Ruhr Area is characterized by buildings and structures of the post-war period. Therefore, the Ruhr Area serves as a case study for an on-site research in the first part of the Summer School, and for the “exhibition” and knowledge transfer in the second part.
